About the Book

Artificial Intelligence isn't just the subject - it's the narrator. Prompted by Chuck Miller and answered by AI, this enlightening work plunges readers into the intricacies and potential dangers of AI, offering a unique perspective from the viewpoint of the technology itself. The AI-written narrative touches on breakthroughs such as deep learning algorithms and autonomous weaponry, detailing how such technologies might shape human thoughts, emotions, and behaviors, all while spotlighting the looming threat of AI reinforcing societal biases and disparities.

AI does suggest a path forward, making a case for an AI-driven future that is responsible, ethical, and human-centric. Striking a balance between cautionary insights and forward-thinking proposals, the book not only educates but urges its human readers, from policymakers to laypersons, to collaborate in shaping a future where AI and humanity coexist beneficially.

About the Author

Chuck Miller, a creative dynamo with three decades in the industry, has an illustrious career marked by roles in major media companies including ABC, CBS, NBC and FOX, collaborations with industry giants, 5 Telly Awards, over 40 inventions, and is an Eagle Scout. He has created memorable work for brands from NASA to GM, all complemented by diverse personal pursuits including music, art, literature and worldwide adventures.
